

# The Global Solution To Low & Variable Water Pressure

Got a pressure problem? We've got the X-Stream™ solution! The Oxygenics® X-Stream™ will revolutionize showering and conserve water and energy in many parts of the world where conservation through high efficiency showerheads has previously been impossible due to low and variable water pressures.

While some "low-pressure" showerheads say they work at pressures as low as 3 psi, in reality the results are disappointing. Weak, dribbly, drippy showerheads that do little more than leave you with empty promises and an empty pocket book. The X-Stream's™ patented fluidic pressure technology increases the velocity of the water so you get an awesome shower, even at 3 psi.

Oxygenics® showerheads are the only high-caliber fixtures on the market with the complete package - a powerful sensational shower spray, a reduced water and energy bill, and a sleek durable design. The core of Oxygenics® showerheads are made of Delrin®, an acetal resin similar to Teflon®, providing the required strength, toughness, and resistance to corrosion and scale buildup that is necessary to ensure long lasting performance. The moment you turn on the Oxygenics® X-Stream™ shower; you'll realize this is like no other showerhead you've ever experienced. Oxygenics® will be your shower choice for life.

**X-Stream™**  
Shower Series

## Features and Benefits

### Stabilizes any water pressure

The X-Stream™ operates effectively from 3 to 80 psi, automatically adapting to low and variable pressures.

### Engineered using Dupont® Delrin® acetal resin

Oxygenics® eliminates clogging, increases durability, and resists corrosion and mineral build-up. It is guaranteed never to clog.

### Uses 1.4 gallons/minute @ 3 psi

The X-Stream™ showerhead can create pressure from virtually nothing, delivering a power-packed shower experience.

### Comfort control adjustment lever

Your choice of spray dynamics lets you select a wide spray, a narrow spray, or anything in between!

### Revolutionary technology

Using a gravity based free flowing drop, the X-Stream™ delivers a great shower experience, regardless of water pressure. Even at ultra-low pressures, the Oxygenics® X-Stream™ out-performs the competition.

### Elegant chrome finish

Beautiful chrome styling complements existing shower fixtures and any bath decor.

### Limited Lifetime Warranty\*

Oxygenics® is guaranteed for life never to clog

### U.S. & World Patents Pending

The California Energy Commission has designated ETL® as an approved laboratory for testing plumbing fittings.

## Specifications

Model	Finish	Flow Rate
300-XLF25	Chrome	2.5

# Take showering to the next level!

## Free Flowing PSI Comparisons - Gallons/Minute

At 3 psi the X-Stream™ produces a whopping 1.4gpm flow rate where the competitors are left with a 0.5gpm trickle. This means even at low pressure you get the effect of a high-pressure shower, not just a drop in the bucket.

While other showerheads are just warming up, the X-Stream™ is already giving you the shower of your life (green). By looking at the chart above you can see how the X-Stream™ produces a pleasing (yellow) shower while similar “low-flow” showerheads fail to perform (red).
